

ABOUT coinIX

As an investment firm, we pursue the goal of analyzing opportunities in the cryptocurrency and blockchain technology market and identifying promising investments. The shares of **coinIX GmbH & Co KGaA** are publicly listed on the Düsseldorf Stock Exchange (**WKN: A2LQ1G | ISIN: DE000A2LQ1G5 | Ticker: CXC**) and offer private and professional investors an opportunity to participate in the potential of blockchain technology.

OUR INVESTMENT MANAGEMENT TEAM

Our investment team combines deep blockchain, crypto and digitalization know-how with expertise in the financial services industry and other traditional industries, venture capital and regulation. This allows us to quickly grasp the potential of suitable investments and implement a wide range of investment types.

OUR PORTFOLIO

The portfolio of coinIX is composed of liquid cryptocurrencies, classic equity-investments in start-ups and early token projects, where rights are acquired to digital assets that are not yet issued or listed on a marketplace. Our investments span a broad range of blockchain innovations. This includes the next level of digitalization and the application of Web 3 elements such as tokens in traditional industries as well as decentralized finance (DeFi) and Metaverse/NFT projects and blockchain infrastructure. The coinIX team has been monitoring and analyzing the crypto and blockchain market since 2017 in order to identify trends and developments at an early stage. With a total of more than 40 positions, coinIX covers a broad spectrum and participates in the development of this new technology.

coinIX Investments in Mio. Euro

LIQUID COINS (20+)

coinIX invests in classic cryptocurrencies such as Ethereum or Bitcoin, which serve as units of value. In parallel, we also acquire utility tokens that support parts of the blockchain ecosystem and have the potential to benefit from a proliferation of the technology.

EQUITY INVESTMENTS (10+)

Many promising blockchain applications are currently being developed by young startups. Therefore, we also acquire stakes or use other financing instruments to participate in the success of young companies.

TOKEN PROJECTS (10+)

Increasingly, blockchain projects are emerging in which investors acquire tokens that are not yet listed on a marketplace. The purchase of the rights to tokens enables participation in the success of the project. When the tokens are listed at some point, price gains can be realized.
